

PROVIDING LENDENDARY SERVICE TO GATED & HI-RISE COMMUNITIES

Providing a Truly Viable Option

Today, most security companies look the same, say the same things, hire from the same labor pool and operate strictly on a low bid and low service operating model. SecurAmerica was founded on improving the security landscape by providing clients with a different way of doing business.

We operate on a high touch, responsive and customized business platform that creates measurable value for each and every client.

Our residential security program is tailored to the unique needs of your property and the unique nuances and environment associated with your community and its residents.

Our Success: Our People

We carefully recruit, screen and select our personnel based on the role they will play in supporting a high-rise or gated community security program, their ability to work well in a highly visible and challenging position and their ability to successfully demonstrate factors that have been specifically developed for each position.

Our residential “culture match” process takes into account an officer’s personality, skill set, talents and interests and matches these with the unique requirements of both the HOA and residents we are serving. We select only those candidates with a proven track record in superior customer service and consistent enforcement of community rules and policies.

We Specialize in the following services:

- Lobby/gate house ambassador
- Concierge and resident escort services
- Resident and service entrance access control
- Foot and mobile patrols
- Traffic and HOA rules enforcement
- Medical and emergency response
- Residential alarm monitoring
- Resident fire, safety and crime prevention awareness training
- And more
