

SERURITY SERVICES

Providing legendary service

Building the BEST security company with the BEST security professionals the industry has to offer.

Providing a Truly Viable Option

Today, most security companies look the same, say the same things, hire from the same labor pool and operate strictly on a low bid and low service operating model.

SecurAmerica operates on a high touch, responsive and customized business platform –specific to each market we serve - that creates measurable value for each customer and their many stakeholders. We know that by our presence, actions and responsiveness, we make a significant impact on the property, building or facility where we provide security services. We know that we represent you, your owner, company management and the employees, customers, visitors and tenants your organization serves every day. We also are acutely aware that our officers serve as a property's first impression and its first line of defense in the areas of crime and homeland defense.

Our security program is tailored to the unique needs of your property and the very specific differentiators associated with your sector and your facility.

SecurAmerica Fast Facts

American-Owned

Headquartered in Atlanta, Georgia with operations in over 30 markets across the US, we are proud to be an American-owned and operated company

Privately-Held

Our decisions are based on what's best for our clients and our employees NOT what Wall Street thinks we need to do or what might look attractive on a monthly or quarterly spreadsheet!

Fast-Growing

We consistently have been rated the #1 and #2 fastest growing Georgia corporation due to our industry-leading customer satisfaction ratings and word of mouth referrals

Employee-Focused Culture

We are only as good as our people so we have gone to great lengths to create a work culture that is focused on taking care of our employees, offering them comprehensive benefits and career advancement opportunities and treating them with respect and dignity. This is reflected in an annual turnover rate of 29% in an industry that is marked with over 100% turnover!

Training

SecurAmerica's university style training "94frit" programming is customized to the needs of each customer. Our learning pillars include how to deliver "legendary service" to the customers our officers serve; industrial fire and life safety concepts; sector/property security risks (including workplace violence, terrorism and active shooter training); emergency preparedness/response; and liability avoidance/risk management.

Our instructors are teaching professionals who facilitate classroom content delivery, interactive exercises and testing in our state-of-the-art and fully staffed learning centers. Every officer assigned 4 to a property is "certified" as a security professional within the vertical market or sector where the officer will work. This certification process includes the use of customized Off checklists, an initial post test, weekly evaluations during an officer's first 30 days and a very challenging final certification examination that includes written questions and various routine and emergency scenarios.

Our state-of-the-art learning management system delivers a wide range of interactive computer-based training courses to our employees 24/7 and an extensive array of robust reports to track training, comprehension, test scores and officer certifications.

Our People

Most security companies "hire" warm bodies to fill an opening and indiscriminately place them at a site. We carefully recruit, screen and select our personnel based on the role they will play at the site and their ability to work well within the industry and facility environment where they will be assigned. We only select candidates with an impeccable image and engaging demeanor who have a proven ability to demonstrate the success factors that have been specifically developed for each position and shift. All candidates for employment must pass a rigorous multi-tiered background investigation

Our innovative "culture match" process takes into account an officer's personality, skill set, talents and interests and matches these with the unique requirements of the client's setting. Our recruiting efforts include a wide range of sources based on the specific profile associated with the security position that we have been asked to fill. In this manner, we are able to maximize the success and job satisfaction of our officers while delivering at a service level that has escaped many other contract security providers.
